[Learn how we count contributions.](#)

Less  More

This is your **contribution graph**. Your first  is for joining GitHub and you'll earn more as you make [additional contributions](#). More contributions means a darker green square for that day. Over time, your chart might start looking [something like this](#).

We have a [quick guide](#) that will show you how to create your first repository and earn more green squares!

The screenshot shows a web browser window displaying the GitHub repository page for 'dainvinc/mscs630koosuri'. The browser's address bar shows the URL 'https://github.com/dainvinc/mscs630koosuri'. The repository page header includes the repository name, a search bar, and navigation links for 'Pull requests', 'Issues', and 'Gist'. Below the header, the repository is identified as 'Private' and shows 0 Watchers, 0 Stars, and 0 Forks. A navigation bar at the bottom of the header contains links for 'Code', 'Issues', 'Pull requests', 'Projects', 'Wiki', 'Pulse', 'Graphs', and 'Settings'. The main content area features a 'Quick setup' section with instructions for cloning the repository using HTTPS or SSH. Below this, there are two sections for creating or pushing a repository from the command line, each with a code block containing the necessary Git commands. The Windows taskbar at the bottom shows the time as 3:42 PM on 1/23/2017.

Quick setup — if you've done this kind of thing before

Set up in Desktop or **HTTPS** **SSH** <https://github.com/dainvinc/mscs630koosuri.git>

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# mscs630koosuri" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/dainvinc/mscs630koosuri.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/dainvinc/mscs630koosuri.git
git push -u origin master
```
